Hey Dan,
I just realized you may not be aware of this. DOH is going to re-public notice this permit in order to change the assimilative capacity assessment to be in line with the Kailua permit (see email chain below).

Hi Elizabeth,

We are going to contact the MCB Kaneohe and inform them about the Kailua permit decision and re-public noticing.

Thanks,
Darryl

Subject: MCB Kaneohe Bay WRF and assimilative capacity for Kailua WWTP

Hi All,

I was just reviewing the MCB Kaneohe Bay WRF public-noticed permit and realized that this decision on Kailua may have a large impact on this permit. The same exact data for ammonia was used, since they share an outfall with Kailua, and therefore, the decision for the MCB Kaneohe permit was not to provide dilution and to provide a compliance schedule for ammonia. In order for the MCB Kaneohe permit to be updated consistent with the decision regarding Kailua, the permit would probably need to be re-public noticed. Have you considered this issue?

Sincerely,
Elizabeth

Subject: Kailua Regional WWTP

Hi Elizabeth,

I forgot to mention to you when I emailed the revised draft permit and fact sheet for Kailua Regional WWTP yesterday that the Branch decided to grant assimilative capacity for ammonia nitrogen. We used the rationale that although there was one year that was above 90% of the WQS, there was a declining trend in geomeans. Please let us know if you want to talk about this further. Thanks!

Kris
